Home Work Problem 7

Transform the simplified equations (Eqs. 1, 5 and 6, topic10 slides) of free convection flow into non-dimensional form using the following non-dimensionalization scheme.

Assume $\alpha = \nu$.

$$\frac{\partial u}{\partial x} + \frac{\partial v}{\partial y} = 0 \dots\dots\dots(1)$$

$$\frac{\partial u}{\partial t} + u \frac{\partial u}{\partial x} + v \frac{\partial u}{\partial y} = g_x \beta (T - T_\infty) + \nu \frac{\partial^2 u}{\partial y^2} \dots\dots\dots(5)$$

$$\frac{\partial T}{\partial t} + u \frac{\partial T}{\partial x} + v \frac{\partial T}{\partial y} = \alpha \frac{\partial^2 T}{\partial y^2} \dots\dots\dots(6)$$

$$\xi = x(g \beta \Delta T / \nu^2)^{\frac{1}{3}}$$

$$\eta = y(g \beta \Delta T / \nu^2)^{\frac{1}{3}}$$

$$\tau = t(g \beta \Delta T)^{\frac{2}{3}} / \nu^{\frac{1}{3}}$$

$$\bar{u} = u / (\nu g \beta \Delta T)^{\frac{1}{3}}$$

$$\bar{v} = v / (\nu g \beta \Delta T)^{\frac{1}{3}}$$

$$\theta = \frac{T - T_\infty}{T_1 - T_\infty} = \frac{T - T_\infty}{\Delta T}$$
