Introducing Dr. Martin Bohner

MARTIN BOHNER, CURATORS' PROFESSOR OF MATHEMATICS AND STATISTICS AT MISSOURI UNIVERSITY OF SCIENCE AND TECHNOLOGY,

is an internationally recognized leader in the field of time scales calculus. His book, *Dynamic Equations on Time Scales: An Introduction with Application*, co-authored with Dr. Allan Peterson from the University of Nebraska-Lincoln, is the main textbook on the subject of time scales.

Bohner, president of the International Society of Difference Equations, studies differential, difference and dynamic equations and their applications to economics, finance, biology, physics

and engineering. He has written four books and more than 190 journal articles, is editor-in-chief of two international journals and associate editor of more than 50 international journals. His work has been cited more than 9,100 times in literature.

Bohner earned bachelor's and master's degrees in economathematics at the University of Ulm in Germany in 1989 and 1993, respectively, a master's degree in applied mathematics from San Diego State University in 1992, and a Ph.D. in natural sciences from the University of Ulm in 1995.

Founded in 1870 as the University of Missouri School of Mines and Metallurgy (MSM), Missouri S&T was one of the first technological institutions west of the Mississippi River. In 1964, the name was changed to the University of Missouri-Rolla (UMR) as the "school of mines" became a full-fledged research university. Today, the campus is meeting the technological challenges of the 21st century as Missouri University of Science and Technology.

discover. Create. Innovate.
