SCOPE

- The Turkish Journal of Mathematics is published electronically 6 times a year by the Scientific and Technological Research Council of Turkey (TÜBİTAK).
- Accepts English-language original research manuscripts in the field of mathematics. Review articles are only considered for publication in exceptional circumstances.
- Contribution is open to researchers of all nationalities.

EDITORIAL BOARD

- Alexander DEGTAREV, Bilkent University, Turkey
- Ali Bülent EKİN, Ankara University, Turkey
- Ali Sinan SERTÖZ, Bilkent University, Turkey
- Anar DOSİ, Middle East Technical University, Turkey
- Arne WINTERHOF, Johann Radon Institute, Austria
- Bayram ŞAHİN, Ege University, Turkey

CONTENTS

Preface: Recent investigations on differential and difference equations and their applications	i
Martin BOHNER, Snezhana HRISTOVA	
Infinitely many positive solutions for an iterative system of conformable fractional order dynamic boundary value problems on time scales	338
Mahammad KHUDDUSH, Kapula Rajendra PRASAD	
Uniformly convergent finite difference method for reaction-diffusion type third order singularly perturbed delay differential equation	360
Rajendran MAHENDRAN, Veerasamy SUBBURAYAN	
Determination of a differential pencil from interior spectral data on a union of two closed intervals	377
İbrahim ADALAR	
Discrete impulsive Sturm–Liouville equation with hyperbolic eigenparameter	387
Turhan KÖPRÜBAŞI, Yelda AYGAR KÜÇÜKEVCİLİOĞLU	
Scattering properties of impulsive difference Dirac equations	397
Seyda SOLMAZ, Elgiz BAIRAMOV	
Scattering theory of the quadratic eigenparameter depending impulsive Sturm–Liouville equations	406
Güler Başak ÖZNUR, Elgiz BAIRAMOV	
Limited frequency band diffusive representation for nabla fractional order transfer functions	416
Yiheng WEI, Yingdong WEI, Yuqing HOU, Xuan ZHAO	
Existence of solutions for an infinite system of tempered fractional order boundary value problems in the spaces of tempered sequences	433
Khuddush MAHAMMAD, Rajendra Prasad KAPULA, Leela DODDI	
On bounded solutions of a second-order iterative boundary value problem	453
Safa CHOUAF, Ahlème BOUAKKAZ, Rabah KHEMIS	
Global existence and energy decay for a coupled system of Kirchhoff beam equations with weakly damping and logarithmic source	465
Ducival Carvalho PEREIRA, Carlos Alberto RAPOSO, Adriano Pedreira CATTAI	
Solvability of Gripenberg’s equations of fractional order with perturbation term in weighted L_p -spaces on $\mathbb{R}^+$	481
Mohamed M. A. METWALI	
Boundary value problems for a second-order (p, q) -difference equation with integral conditions	499
İlker GENÇTÜRK	
A discussion on the existence and uniqueness analysis for the coupled two-term fractional differential equations	516
Sachin Kumar VERMA, Ramesh Kumar VATS, Avadhesh KUMAR, Velusamy VIJAYAKUMAR, Anurag SHUKLA	

Mathematical analysis of local and global dynamics of a new epidemic model	533
Sümeyye ÇAKAN	
Two nonzero weak solutions for a quasilinear Kirchhoff type problem	552
Lin LI, Stepan TERSIAN	
A sequential fractional differential problem of pantograph type: existence uniqueness and illustrations	563
Soumia BELARBI, Zoubir DAHMANI, Mehmet Zeki SARIKAYA	
On a solvable system of rational difference equations of higher order	587
Merve KARA, Yasin YAZLIK	
On the existence for parametric boundary value problems of a coupled system of nonlinear fractional hybrid differential equations	612
Yige ZHAO, Yibing SUN	
On stability and oscillation of fractional differential equations with a distributed delay	626
Limei FENG, Shurong SUN	
Multiple positive solutions for nonlinear fractional q -difference equation with p -Laplacian operator	638
Zhongyun QIN, Shurong SUN, Zhenlai HAN	
The complex error functions and various extensive results together with implications pertaining to certain special functions	662
Hüseyin IRMAK, Praveen AGARWAL, Ravi P. AGARWAL	
Solving nonlinear integro-differential equations using numerical method	675
Nedjem Eddine RAMDANI, Sandra PINELAS	

Recent investigations on differential and difference equations and their applications

Preface

Differential and difference equations are very useful tools for adequate modelling of dynamic processes. It leads us to further studying various types of these equations and related initial and boundary value problems, to develop approximate methods for their solutions, as well as to their successful applications to real-world problems. This special issue invited papers focusing on recent and novel developments in the theory of any types of differential and difference equations and inclusions, especially on analytical and numerical results for fractional ordinary and partial differential equations.

We are pleased to present to the readers of the *Turkish Journal of Mathematics* this volume of twenty-two carefully selected works on recent investigations in differential and difference equations and their applications. These 22 papers are written by 47 eminent mathematicians based in nine countries (Algeria, Brazil, Bulgaria, China, Egypt, India, Portugal, Turkey, and USA). There are six papers in ordinary differential equations and their applications, including delay differential equations, integro-differential equations, inverse problems, and epidemic models. Eight papers discuss fractional equations and their applications, including fractional differential equations, fractional difference equations, fractional quantum difference equations, and fractional integral equations. Three papers consider settings within difference equations, one within quantum difference equations, and another one within dynamic equations on time scales. Two papers in partial differential equations and one paper in special functions complete the volume.

The editors would like to thank all authors for their contributions, all referees who have helped with their hard work to select only the best papers of highest quality, the production staff at the Scientific and Technological Research Council of Turkey (TÜBİTAK), and the Editor-in-Chief of the *Turkish Journal of Mathematics*, Professor Dr. Adnan Tercan (Ankara, Turkey). The editors hope that this collection of papers will attract interest of researchers working in related areas and will stimulate further progress in the study of differential equations, difference equations, and dynamic equations on time scales.

Guest Editors: *Martin BOHNER (Rolla) and Snezhana HRISTOVA (Plovdiv)*
