
Course Overview

Course Description: This course presents reliability and fault tolerance for network-centric systems, including models, metrics, and analysis techniques. This course also concentrates on security, including technical tools and methods for audit and assessment as well as management and policy issues. (Co-listed with SysE 6322)

Prerequisite: SysE 6321/CpE 6410 or CPE 5420

Class Number: On Campus: CPE: 73037 & SysE: 73039 – Distance Education: CPE: 73038 & SysE: 73040

Credit Hours: 3.0

Time: Th @ 4:00 pm – 6:30 pm

Location: Library G14 and Distance Education

Instructor: Egemen K. Çetinkaya

Instructor Contact Information:

132 Emerson Electric Co. Hall
301 W. 16th St.
Rolla, MO 65409-0040

Phone: +1 573 341 6887
E-mail: cetinkayae@mst.edu
Skype: starpasha2004

Instructor Office Hours: TR @ 1:00 pm – 3:00 pm or by appointment

Administrative Assistant: Ms. Carol Lay, +1 573 341 4509, layc@mst.edu, 143 Emerson Electric Co. Hall

CPE 6510 Course Website:

http://web.mst.edu/~cetinkayae/teaching/CPE6510Spring2015

CPE 6510 Spring 2015 Syllabus: This syllabus is for all sections of this course
## Course Schedule

**Tentative schedule** of lectures, readings, assignments, and exams. Dates in the future subject to change.

<table>
<thead>

17 March 2015: Midterm grades due by instructor  
23 March 2015: Midterm grades available via Joe'SS  
19 May 2015: Final grades due by instructor  
26 May 2015: Final grades available via Joe'SS
Course Materials

Books

There will not be a required textbook for this class.

Optional Books

Supplementary Books

[B1997] Yaneer Bar-Yam, *Dynamics of Complex Systems*, Addison-Wesley, 1997. (Note that this was the supplemental textbook for SysE 6321/CPE 6410. It is available online via author's website.)

**Papers**

Course Policies

These policies are subject to change and students will be notified of any changes.

Correspondence

Don't hesitate contacting me outside of the office hours, but first confirm my availability via e-mail. **Subject line** of all e-mails regarding this class must start with: CPE6510 - followed by a meaningful indicator of the content. Otherwise, e-mails can be misfiltered and not read (faculty members receive many e-mails daily). If you don't hear from me within 48 hours, please resend the e-mail. I expect students will check their e-mails regularly for any announcements. We will primarily utilize the [course website](#) and (maybe) [Blackboard](#) during this class. I will utilize [S&Tconnect](#) for potential performance issues. You can also instant message me via Skype, but do not call on Skype before confirming my availability. The [course Facebook page](#) will be utilized to share news, interesting facts, discussions etc.

Attendance

On-campus students are expected to attend all classes. Students enrolled in the distance education section of the course are encouraged to participate in the live class, but are welcome to watch the [archived lectures](#) instead. Note that 5% of the course grade is constituted by student participation activities such as in-class interactions. Attendance to the midterm exam, which will be administered during the class time (Midterm Exam: 5 March 2015), and in-class project presentations (7 May 2015) are mandatory. There will not be make-up options for these unless prior arrangements are made, or in the event of emergencies and sudden illness (which must be documented by the student). If you are in a state of contagious illness (e.g. [Flu](#), [Ebola](#)), don't come to the class but notify me ahead of time. Flu shots are recommended for everyone.

Classroom Courtesy

We will physically meet in the [Library G14](#) and the lectures will be webcast as well as archived. Students are expected to **be prompt to the class**. Due to interference with the recording system, I will ask everyone to **turn off their cellphones** (not even silence or vibrate!). Please avoid typing or eating snacks near the microphones as it creates annoying noise to others.

Assignments

Assignments are due on the due date at **11:59 pm**. Unless prior arrangements are made, late assignments are not accepted. Assignments must be sent either in pdf as an attachment or plaintext e-mail format.
Readings

Students are expected to read all required readings before the corresponding lecture. While most paper readings are hyperlinked to a version that is available on the author's webpage, some are not; however, all papers are available via the library.

Presentations

Students are expected to give 2-3 presentation(s) in the corresponding class throughout the semester based on a scholarly paper. Each presentation is expected to last ~25 min. Student initials are marked (e.g. JM1 Joe Miner1) in the schedule. You will be required to search for a paper/topic and send at least three options one week prior to your presentation. Presentations must be sent 48 hours in advance so I can provide feedback to you. You can use the presentation guidelines found in this template. Presentations will be evaluated based on the following scoring rubric (thanks to Vicki Hopgood for the rubric).

Computer Labs

The Linux desktops are located in EECH 107 & CS 213 and you can SSH into these machines using VPN (Note that there is a new VPN client). The Windows PCs are located in EECH 105 & 106. I expect that students will use the computing resources according to the MST IT Policy. If you need resources for any intrusive testing or programming, contact me first. If you have computer-related problems, contact IT Help Desk.

Collaborative Software Support

For WebEx problems, contact Video Communications Center (VCC). For Blackboard problems, contact Educational Technology (EdTech).

Disability Support

If you have a documented disability and anticipate needing accommodations in this course, you are strongly encouraged to meet with me early in the semester. You will need to request that the Disability Support Services staff send a letter to me verifying your disability and specifying the accommodation you will need before I can arrange your accommodation.

Academic Integrity

Academic integrity is an essential part of your success at MST (and thereafter). Academic dishonesty such as cheating, plagiarism, or sabotage is prohibited, and MST policy will be followed upon any instance of these. Following are the guidelines:
Homework

- You can discuss homework with each other, but cannot write up together.
- You can use the Web/books/papers/library for finding a solution methodology, but do not search for a solution manual nor use an existing solution manual for your assignment.
- Any student who copies or permits another student to copy will receive a 0 for the assignment, and the MST policy will be initiated.

Software

- You can discuss code/pseudocode with each other, but cannot write the software together unless it is a group project.
- You can use software libraries available, but properly cite the source in your code as a comment.
- Any student who copies or permits another student to copy will receive a 0 for the assignment, and the MST policy will be initiated.

Exams

- You are expected to answer exam questions by yourself. No additional resources (e.g., programmable calculators, phones, cheat sheets, etc.) are allowed and cheating in the exams is forbidden.
- Any student who copies or permits another student to copy will receive a 0 for the exam, and the MST policy will be initiated.

Project Report

- You must not copy/paste your report from other resources.
- Proper citation is required for the work of others.
- I will utilize SafeAssign plagiarism detection software.
- Any student who plagiarizes will receive a 0 for the project, and the MST policy will be initiated.
- Below are some links that can be useful for the writing part of any submission:
  1. MST Writing Center
  2. Reference Sources and Literature Citation by James P.G. Sterbenz
  3. Academic Integrity and Plagiarism by James P.G. Sterbenz
  4. Writing Technical Articles by Henning Schulzrinne

Penalties vary from a warning up to expulsion from the university. Before your actions, I suggest you think twice, and save us headache. When in doubt, don't hesitate to ask me!
Grading

This course is intended for graduate level students. If you are not a graduate student or have not taken the prerequisites for this class, talk to me as soon as possible. The grade for graduate students cannot be lower than C.

<table>
<thead>
<tr>
<th>Grading Scale</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Percentile</td>
<td>Letter</td>
<td>Significance</td>
</tr>
<tr>
<td>90-100</td>
<td>A</td>
<td>Excellent</td>
</tr>
<tr>
<td>80-89</td>
<td>B</td>
<td>Superior</td>
</tr>
<tr>
<td>70-79</td>
<td>C</td>
<td>Medium</td>
</tr>
<tr>
<td>00-69</td>
<td>F</td>
<td>Failure</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grading Weights</th>

<tr>
<td>10%</td>
<td>Homework and quizzes</td>
</tr>
<tr>
<td>40%</td>
<td>Project</td>
</tr>
<tr>
<td>5%</td>
<td>Participation</td>
</tr>
</tbody>
</table>

Important Notes:

- There will not be a final exam in this class, thus the project is an important part of your grade.
- Midterm exam will cover topics from the beginning of the class to mid-term exam, which will be administered on 5 March 2015.
- Online students must have a webcam and a headset (microphone and speaker) [for proctoring]. Ability to print and scan (either scanner or high resolution camera) PDF documents is required for the exams.
- Exam will cover every topic we discuss in class (including student presentations).
- Each student is expected to present 2-3 papers throughout the semester. The in-class student presentations will contribute 20% of the overall grade. Presentations will be evaluated based on the following scoring rubric (thanks to Vicki Hopgood for the rubric).
- There will be occasional homework assignments and quizzes to provide you and me with feedback of your understanding of the course topics.
- Participation grades will be based on questions asked, interactions, leading discussions, finding the bugs in lecture notes and course website, recommendations for reading, etc.
- Employer reimbursement and immigration status cannot be a consideration in the final grade.
- Publishable projects are subject to extra credit.

Feedback

Do not hesitate to contact me if you have opinions to improve the course. You don't have to wait until end of semester.
Project Prospects

Students are expected to explore a topic of their choice that is relevant to the class in detail through the project. Project teams will be formed of at most three students (generally two) per team. The project grade contributes a major portion of the final grade. The overall project grade (extra credit will be given for publishable projects with my guidance) will depend on:

<table>
<thead>
<tr>
<th>Percentile</th>
<th>Component</th>
</tr>
</thead>
<tbody>
<tr>
<td>40%</td>
<td>Novelty of ideas and results</td>
</tr>
<tr>
<td>40%</td>
<td>Project report</td>
</tr>
<tr>
<td>20%</td>
<td>Project presentation</td>
</tr>
</tbody>
</table>

Project reports **must** be sent only in **pdf** format. Final reports should be in total length of 10-15 pages. You can use this [MS-Word template](#) or [LaTeX template](#) for project reports. Students must submit the deliverables according to the following dates:

<table>
<thead>
<tr>
<th>Due Date</th>
<th>Deliverable</th>
</tr>
</thead>
<tbody>
<tr>
<td>19 February 2015</td>
<td>Project title and group members</td>
</tr>
<tr>
<td>19 March 2015</td>
<td>Project report draft - title, abstract, outline</td>
</tr>
<tr>
<td>23 April 2015</td>
<td>Project report draft - solid draft with references</td>
</tr>
<tr>
<td>7 May 2015</td>
<td>Project presentations during class</td>
</tr>
<tr>
<td>14 May 2015</td>
<td>Project reports due</td>
</tr>
</tbody>
</table>

Project teams and topics are as below:

<table>
<thead>
<tr>
<th>Team (initials)</th>
<th>Topics</th>
</tr>
</thead>
<tbody>
<tr>
<td>{JM1, JM2}</td>
<td>Resilient Networking Topic 1</td>
</tr>
</tbody>
</table>
