UNEXPECTED
This isn’t business as usual.

From a single seed in a farmer’s field to a dinner table halfway across the globe, Cargill brings ideas together to help satisfy the world’s needs. To get there, we collaborate with customers to create better products and services, streamline supply chains, save energy, reduce costs and move goods to every corner of the planet. We help farmers get higher yields from fewer acres, and store crops so they have greater flexibility in marketing their harvest. We give back to the communities where we do business through continuous efforts to improve nutrition, health and education, and protect natural resources. Every day, Cargill nourishes people and ideas — in both expected and unexpected ways.
This is Cargill.
EXPECT

Evolving Knowledge
Risk Management
Environmental Innovation
Healthier Living
Long-Term Relationships
Reliable Distribution
Consumer Insights
Higher Yields
Commitment to Safety
More than half of all Cargill employees live and work in developing countries.

Global Cargill locations use renewable energy such as biogas, landfill gas and biomass to lower our carbon footprint.

A gift of $10 million to CARE is funding a program to help 100,000 people in six countries lift themselves out of poverty.

Our Wahpeton, North Dakota, plant was named to IndustryWeek’s Top 10 Plants in North America for excellence in operations, including safety and innovation.

From starches to seaweed extracts, Cargill’s unmatched portfolio of texturizing ingredients is put to use in more than 5,000 customer solutions worldwide.

With the ability to sell more than 14 million tons annually, Cargill is one of the leading marketers of salt products.

Metric tons of grain that can be stored in Cargill’s Baie Comeau grain transfer elevator, the largest in North America.
2.1 MILLION
In China, Cargill has trained more than 2.1 million farmers in crop nutrition, animal breeding and feeding technologies.

80+
To reduce greenhouse gas emissions, Cargill teams up with customers and partners around the world in developing more than 80 carbon reduction projects.

BY SHARING EXPERTISE, WE ALL MOVE AHEAD FASTER.
Cargill’s breadth of knowledge is unique, but our real point of difference is the ability to collaborate with customers and partners to solve complex business problems. Like helping a major restaurant chain create a zero-trans-fat-per-serving cooking oil for French fries without sacrificing the flavor consumers love. Because Cargill plays a critical role throughout the world’s food chain, farmers and food companies look to us for insight and partnerships, as well as customized strategies and tools to manage risk and stabilize pricing.

1 MILLION

Our CoroWise™ plant sterols, an ingredient used in a variety of consumer products, helps one million people per day manage their cholesterol level.
In India, where vitamin deficiency is a major health concern, Cargill reaches 25 million people per month with cooking oil fortified with essential vitamins.

FRESH IDEAS STRETCH ALL THE WAY FROM THE CONFERENCE ROOM TO THE DINING ROOM.
Over the years, our people have made countless discoveries used in consumer, agricultural and industrial applications, and we’re still at the forefront today. When we pioneered steam pasteurization — revolutionizing the way the beef industry battles E.coli — we shared the technology freely with our competitors. In animal nutrition, we optimize feeds to get the most out of every ounce. We formulate packaged foods and restaurant fare to get flavors and textures just right. And we create specialty ingredients that help restore nutritional balance, manage weight, lower cholesterol, and promote joint and heart health.

1,900

With more than 1,900 patents globally, Cargill continuously brings cutting-edge innovations to food and agriculture.
We load and discharge bulk goods in more than 6,000 ports around the world for Cargill and our customers.
Our business has always been based upon moving surplus to need, so we’ve refined ocean freight transportation and supply chain management to an art form. By retooling customer distribution networks, Cargill helps accelerate time to market, realize new cost efficiencies and ensure supply chain integrity. As a case in point, we connected a Japanese producer of premium eggs with an Illinois farmer who grows corn for chicken feed to the producer’s exact specifications. And to make our customers’ shipping dollars go further, we’ve become one of the most flexible and reliable cargo shippers on the planet.

From Germany to Cameroon, Cargill malt goes to brewing customers in 43 countries across five continents.

Tanker loads of palm kernel oil supplied by Cargill in Malaysia to a global food manufacturer in Thailand with a perfect record for quality, quantity and on-time delivery.
200 THOUSAND
Cargill is part of a coalition led by the World Cocoa Foundation to improve the livelihoods of 200,000 cocoa farmers throughout West Africa.

› HEALTH. EDUCATION. SAFETY. CONSERVATION. IT’S HOW WE PUT OUR HEARTS INTO OUR WORK.

270
A global network of more than 270 Cargill Cares Volunteer Councils help our employees make a difference in communities around the world.
We recognize that our success is dependent upon the growth and well-being of our communities, as well as the sustainability of natural resources. Whether we are supporting schools in Honduras or providing safe drinking water to children in Thailand, Cargill helps nourish people around the world. Initiatives like these often stem from partnerships with organizations such as the United Nations World Food Programme and the World Wildlife Fund. Through our many efforts, we are succeeding in boosting rural economic development, protecting endangered species, safeguarding the food supply and improving worker safety—for our employees and for others throughout the supply chain.

In Brazil, Cargill partners with local authorities to support elementary education and early childhood literacy programs that reach 46,000 students.
Cargill collaborated to create Truvia™, the first natural, zero-calorie sweetener made with rebiana, the best-tasting part of the stevia leaf.

A TRADITION OF TRANSFORMING THE FUTURE FOR MORE THAN 140 YEARS.
Since 1865, Cargill has found innovative ways to better people’s lives. With each generation, we’ve managed to adapt to the challenges of the day. Populations shift, tastes evolve, regulations change, technologies break through. We rely on our experience and foresight to decipher the trends and bring new ideas to light—sometimes unexpectedly. In 2000, we brainstormed alternatives to depositing turkey feathers in landfills. Today we’ve developed a premium organic fertilizer made of turkey feathers for use on golf courses. It’s just one of the ways we help customers turn today’s challenges into tomorrow’s opportunities.
Cargill collaborates with farmers, food makers and industrial customers to bring fresh ideas to the table and nourish people around the world. With some 160,000 people on six continents, we are leveraging our depth of knowledge to help our customers succeed and communities thrive.
