Hello,

The Student Activity Funding Board continues to develop an understanding of student funding and fees in order to facilitate productive discussions in the Missouri S&T Student Council. With the start of the fall semester, the time has come again to consider both the Student Activity Fee and other related fees. The Student Activity Finance Board (SAFB) continues to update and improve this, to keep up with the pressures of the student body.

While the Student Services Fee lies outside of the Student Activity Fee, we are asking for your assistance in having a meaningful discussion by providing an overview of how the money raised from this fee translates into student impacts. A template has been prepared that is similar to the templated used for the Student Activity Fee, but doesn’t delve as deeply into budgets, instead focusing on high level impacts. An example of this document is attached, and also available at http://mst.edu/~gdcwd5/.

We hope that your organization will take the time to not only meet directly with the Student Activity Finance Board, but will also attend a Student Council meeting to present how the fee translates into student impact, and consider student feedback. We look forward to starting the conversation on arranging these meetings.

Thank You,

Austin Martin
DSF Committee Member
