AEROSOLS

Proposal for a New Counter for CN and CCN in the Atmosphere, Ruprecht Jaenicke*, Yang Jiangliang and Volker Dreiling, Institut fur Physik der Atmosphere, University Mainz, D-55099 Mainz/Germany

Thermodynamics of water condensation on marine aerosols with hydrophobic coating proceeded by hydroxyl radicals, Yuri Djikaev, Department of Chemistry, University of Toronto, Toronto M5S 3H6, Canada

Effect of operator splitting on detailed aerosol particle growth simulations Frank Mueller, Meteorological Institute, University of Hamburg, Bundesstr. 55, Hamburg 20146, Germany

Aerosol particle size distributions, total number and IN concentrations in Moscow Region, N.O. Plaude* and M.V. Vychuzhanina, Central Aerological Observatory, Russia, 141700, Moscow Region, Dolgoprudny, Pervomayskaya St. 3

Sea ice deformation as a source of ice-born aerosol, A.P. Nagurny, Arctic and Antarctic Research Institute, 38 Beringa street, St. Petersburg, 1999397, Russia

Investigation of aerosol scavenging efficiency by precipitation, Sinkevich A.A., Dovgaljuk Ju.A., Ishenko M.A., Ponomarev Yu.Ph., Stepanenko V.D, A.I. Voeikov Main Geophysical Observatory, Karbyshev str. 7, St. Petersburg, Russia, 194021

TEMPORAL VARIATION OF AEROSOL SIZE DISTRIBUTION AT A TROPICAL STATION (MYSORE, 12N) FROM GROUND-BASED SUNPHOTOMETER STUDIES BSN. Prasad*, B. Narasimhamurthy and NV. Raju- DOS in Physics, University of Mysore, Mysore 570 006, India.(POSTER)

Thermodynamics and kinetics of condensation on wettable macroscopic nuclei: new results, A. Shchekin, St Petersburg State University, Department of Statistical Physics, 1, Ulyanovskaya, Petrodvoretz, St Petersburg, 198904 Russia

The thermodynamic theory of effects of internal and external electric field in nucleation, A. Shchekin, St Petersburg State University, Department of Statistical Physics, 1, Ulyanovskaya, Petrodvoretz, St Petersburg, 198904 Russia

Atmospheric Contamination by Fibrous Aerosols, Kvetoslav Spurny, Eichenweg 6, 5948 Schmallenberg, Germany
Atmospheric Condensation Nuclei: P. J. Coulier 1875
and J. Aitken 1880 (Historical Review), Kvetoslav Spurny,
Eichenweg 6, 5948 Schmallenberg, Germany

Transportation and Transformation of Trace Gases and Aerosols by Convective
Clouds, Yan Yin, Department of Geophysics and Planetary Sciences, Tel Aviv
University, 69978 Israel

On the composition and optical extinction of particles: in the tropopause
region, BERND KAERCHER, DLR Institut fuer Physik der Atmosphaere, Wessling,
882234, Germany and Susan Solomon, NOAA, USA

Changes in the concentration and size distribution of submicron aerosols
accompanied with the Polar lows at Maitri, Antarctica, A K Kamra and C G
Deshpande, Indian Institute of Tropical Meteorology, Dr Homi Bhabha Marg,
Pashan, Pune 411 008, India

The Electric Charging of Aerosols in High Ionized Atmosphere,
F. Gensdarmes*, D. Boulaud CEN Saclay, IPSN/DPEA/SERAC, Bat 389,
IPSN/DPEA/SERAC CEA/Saclay, Bat 389, 91191 Gif-sur-Yvette cedex,
France and A. Renoux, Universite Paris XII, Laboratoire de Physique
des Aerosols et de Transfer des Contaminations, Av. Du General de Gaulle,
94010 Creteil cedex, France

Characterization of aerosol particles by their heterogeneous
nucleation: activity at low supersaturations with respect to
water and various organic vapors. W. HOLLANDER, W. Dunkhorst
and H. Windt, Fraunhofer Institute of Toxicology and Aerosol Research,
D-30625 Hannover, Germany

NUCLEATION

Nucleation rates from the piston expansion tube (pex-tube) using a digital
camera F. Peters*, A. Grassmann, University of Essen, 45117 Essen, Germany

Condensation induced oscillations in supersonic expansion flows,
Grazia Lamanna, Eindhoven University of Technology, PO Box 513
Eindhoven 5600MB, The Netherlands

Experimental studies of ionic clusters containing H2SO4, H2O, and NH3;
an evaluation of their role in atmospheric nucleation, Ned Lovejoy,
NOAA Aeronomy Laboratory, Boulder, CO 80303  Nucleation in physical and non-physical systems:

Formation of molecular clusters in supersaturated vapours and of vehicular jams on over-crowded roads: A comparison based on deterministic and stochastic description, Reinhard Mahnke, Department of Physics, University of Rostock, Rostock, Germany

Nucleation of water vapour in methane at high pressures, Paul Peeters, Eindhoven University of Technology, PO Box 513, Eindhoven, The Netherlands

"Idiosyncrasies of Nucleation in Large, Deeply Supercooled Liquid Clusters, L. S. Bartell, University of Michigan, Ann Arbor Michigan, USA

Homogeneous nucleation in high-pressure multicomponent systems: Application to mixtures of n-alcanes, J. Hruby*, P. Peeters, M.E.H. van Dongen, Academy of Sciences of the Czech Republic, Institute of Thermomechanics, Dolejskova 5 182 00 Prague 8

Laboratory studies of ice nucleation by aerosol particles in upper tropospheric conditions P.J. DEMOTT, D.C. Rogers, S.M. Kreidenweis, and Y. Chen Department of Atmospheric Science, Colorado State University, Fort Collins, CO 80523-1371

Crystal Nucleus Formation on Substrates -Particles with Finite Dimensions in the Area of Micro and Nanodimensions. Equilibrium Forms and Wulff’s Theorem" Miloshev G. and N. Miloshev, Geophysical Institute - BAS, Acad.G.Bonchev Str. bl.3, 1113 Sofia, Bulgaria

Reconciling Gibbs and van der Waals: A New Approach to Nucleation Theory, Jurn W. P. Schmelzer, University of Rostock, 18051 Rostock, Germany

Phase Transitions in Ice Phase of Clouds under the Influence of Adsorbed Ions Electric Field, V. V. Klingo, Main Geophysical Observatory, St. Petersburg, Russia (POSTER)

Water Molecules' Orientation in Surface Layer, V. V. Klingo, Main Geophysical Observatory, St. Petersburg, Russia (POSTER)

Atomic and Molecular Ions of Natural Atmosphere, V. V. Klingo, Main Geophysical Observatory, St. Petersburg, Russia (POSTER)
Influence of Substrate Electric Charge on Heterogeneous Ice Phase Formation in Clouds, V. V. Klingo, Main Geophysical Observatory, St. Petersburg, Russia (POSTER)

A revised interpretation of snow crystal habit changes, Laura Levi, Comision Nacional de Energia, Mendoza 2555, Buenos Aires 1428, Argentina
