

Message from the President: Dr. Bih-Ru Lea (李璧如教授)

Please join us in St. Louis for the 2013 MCASTA Symposium to discover “**Public Health, Personal Well-being: Imagining the Possibilities ...**” It is our goal to disseminate advanced academic research in a way everyone can relate to see how such researches affect everyone’s daily life. World renowned researchers and scholars will bring their revolutionary researches to very lively, practical, and interactive presentation and discussion to stimulate creative thoughts and to advance future research.

There is a program for everyone!! Join renowned educators, scientists, and researchers to learn different aspects of food and preventive medicine, to discover socioeconomic causes and consequences of public health, to explore IT applications in public health and infectious disease control, to examine emotional aspect of public health and more. Come to meet exceptional and bright young scholars and discover how their research will shape future world to make it a better place to live; take challenges at the ERP SAP Computer Simulation game to get a taste of what IT professionals do at fortune 200 companies like Apple, Intel, Microsoft, MasterCard, Disney, or IBM; network with business executives, business owners, researchers, and college professors for everything you need to know from starting a successful business, career paths, and college advice to tips of parenting... ***Everyone will get something valuables at the end of the conference!!***

In a journey of 30 years, we see MCASTA’s up and down, glories and struggles, triumphs and fighting for survival, and (you name it). Whether you are with MCASTA for one year or for 30 years, join us for an exciting and diversified program **for everyone in your life**. Make it as a professional gathering, as a family event, as a friend reunion, as a date with your significant other, or whatever that comes to your mind; **let’s meet on**

Saturday, September 7!!

Bih-Ru Lea, Ph.D.
