

# Dynamic Systems and Applications

Volume 12, Numbers 1–2, March+June 2003

---

## CONTENTS

### Preface

<b>Ravi Agarwal, B. C. Dhage, and Donal O'Regan</b>	<b>1</b>
The upper and lower solution method for differential inclusions via a lattice fixed point theorem	
<b>Douglas Anderson and Joan Hoffacker</b>	<b>9</b>
Green's function for an even order mixed derivative problem on time scales	
<b>Sigrun Bodine and Donald Lutz</b>	<b>23</b>
Exponential functions on time scales: Their asymptotic behavior and calculation	
<b>Martin Bohner and Gusein Guseinov</b>	<b>45</b>
Improper integrals on time scales	
<b>Stephen Clark and Don Hinton</b>	<b>67</b>
Positive eigenvalues for matrix difference equations	
<b>Valerie Corman</b>	<b>79</b>
Liouville's formula on time scales	
<b>Sarah Day</b>	<b>87</b>
Towards a rigorous numerical study of the Kot-Schaffer model	
<b>Paul Eloe and Qin Sheng</b>	<b>99</b>
A continuation of the discussion on cross symmetry of solutions	
<b>Kristine Ey and Andreas Ruffing</b>	<b>115</b>
Fixing the ladder operators on two types of Hermite functions	
<b>Tom Gard and Joan Hoffacker</b>	<b>131</b>
Asymptotic behavior of natural growth on time scales	
<b>Brian Haile and Leon Hall</b>	<b>149</b>
Polynomial and series solutions of dynamic equations on time scales	

<b>Johnny Henderson and William Yin</b>	<b>159</b>
Two-point and three-point problems for fourth order dynamic equations	
<b>Roman Hilscher and Pavel Řehák</b>	<b>171</b>
Riccati inequality, disconjugacy, and reciprocity principle for linear Hamiltonian dynamic systems	
<b>Billûr Kaymakçalan and Bonita Lawrence</b>	<b>191</b>
Quasilinearization for a nonlinear initial value problem on time scales	
<b>Kirsten Messer</b>	<b>201</b>
A second-order self-adjoint equation on a time scale	
<b>M. Sambandham</b>	<b>217</b>
Hybrid fuzzy systems on time scales	
<b>Andreas Schelling</b>	<b>229</b>
The Euler–Minding analogon and other identities for continued fractions in Banach spaces
