OSHA Hazard Classification: Flammable, irritant, organ effects

### SECTION 3 HAZARDS IDENTIFICATION

Emergency Overview:

Orange liquid with an ether-like odor. Extremely flammable liquid and vapor. Vapors may cause flash fire. May cause eye and skin irritation. Inhalation of vapors or mist may cause respiratory irritation and central nervous system effects. Swallowing may cause irritation, nausea, vomiting, diarrhea and kidney or liver disorders. Aspiration hazard. May be fatal if swallowed. Symptoms may be delayed.

## SECTION 4 FIRST AID MEASURERS

CALL 1-877-740-5015 or 1-303-623-5716 COLLECT

- Skin: Remove contaminated clothing immediately. Wash all exposed areas with soap and water. Get medical attention if irritation develops. Remove dried cement with Oatey Plumber's Hand Cleaner or baby oil.
  Eyes: If material gets into eyes or if fumes cause irritation, immediately
- flush eyes with plenty of water until chemical is removed. If irritation persists, get medical attention immediately.
- Inhalation: If symptoms of exposure develop, remove to fresh air. If breathing becomes difficult, administer oxygen. Administer artificial respiration if breathing has stopped. Seek immediate medical attention.
- Ingestion: DO NOT INDUCE VOMITING. Rinse mouth with water. Never give anything by mouth to a person who is unconscious or drowsy. Get immediate medical attention by calling a Poison Control Center, or hospital emergency room. If medical advice cannot be obtained, then take the person and product to the nearest medical emergency treatment center or hospital.

MSDS No: CEM075E8 Issue Date: 11 Nov 2008 Page: 2 of 5

#### FIRE FIGHTING MEASURES

SECTION 5

Products:

Flashpoint / Method: 14 - 23 Degrees F. (-10 to -5 Degrees C) / CCCFP LEL = 1.8 % Volume, UEL = 11.8 % Volume Flammability: Use dry chemical, CO2, or foam to extinguish fire. Cool fire Extinguishing exposed container with water. Water may be ineffective as an Media: extinguishing agent. Special Fire Firefighters should wear positive pressure self-contained Fighting breathing apparatus and full protective clothing for fires in Procedure: areas where chemicals are used or stored Unusual Fire and Extremely flammable liquid. Keep away from heat and all Explosion sources of ignition including sparks, flames, lighted Hazards: cigarettes and pilot lights. Containers may rupture or explode in the heat of a fire. Vapors are heavier than air and may travel to a remote ignition source and flash back. This product contains tetrahydrofuran that may form explosive organic peroxide when exposed to air or light or with age. Combustion will produce toxic and irritating vapors including Hazardous Decomposition carbon monoxide, carbon dioxide and hydrogen chloride.

#### SECTION 6 ACCIDENTAL RELEASE MEASURES

Spill or Remove all sources of ignition and ventilate area. Stop leak if it Leak can be done without risk. Personnel cleaning up the spill should Procedures: wear appropriate personal protective equipment, including respirators if vapor concentrations are high. Soak up spill with an inert absorbent such as sand, earth or other non-combusting material. Put absorbent material in covered, labeled metal containers. Prevent liquid from entering watercourses, sewers and natural waterways. Report releases to authorities as required. See Section 13 for disposal information.

### SECTION 7 HANDLING AND STORAGE

- Handling: Avoid contact with eyes, skin and clothing. Avoid breathing vapors or mists. Use with adequate ventilation (equivalent to outdoors). Wash thoroughly after handling. Do not eat, drink or smoke in the work area. Keep product away from heat, sparks, flames and all other sources of ignition. No smoking in storage or use areas. Keep containers closed when not in use.
- Storage: Store in a cool, dry, well-ventilated area away from incompatible materials. Keep containers closed when not in use.
- Other: "Empty" containers retain product residue and can be hazardous. Follow all MSDS precautions in handling empty containers. Do not cut or weld on or near empty or full containers.

# SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

- Ventilation: Open doors & windows. Provide ventilation capable of maintaining emissions at the point of use below recommended exposure limits. If used in enclosed area, use exhaust fans. Exhaust fans should be explosion-proof or set up in a way that flammable concentrations of solvent vapors are not exposed to electrical fixtures or hot surfaces.
- Respiratory For operations where the exposure limit may be exceeded, a NIOSH Protection: approved organic vapor respirator or supplied air respirator is recommended. Equipment selection depends on contaminant type and concentration, select in accordance with 29 CFR 1910.134 and good industrial hygiene practice. For firefighting, use self-contained breathing apparatus.
- Skin Rubber gloves are suitable for normal use of the product. For long

MSDS No: CEM075E8 Issue Date: 11 Nov 2008 Page: 3 of 5 Protection: exposures chemical resistant gloves may be required such as 4H(tm) or Silver Shield(tm) to avoid prolonged skin contact. Eye Safety glasses with side shields or safety goggles. Protection: Other: Eye wash and safety shower should be available.

#### PHYSICAL AND CHEMICAL PROPERTIES

| Boiling Point:       | 151 Degrees F / 66 Degrees C |
|----------------------|------------------------------|
| Melting Point:       | Not applicable               |
| Vapor Pressure:      | 145 mmHg @ 20 Degrees C      |
| Vapor Density:       | (Air = 1) 2.5                |
| Volatile Components: | 78-82%                       |
| Solubility In Water: | Negligible                   |
| pH:                  | Not applicable               |
| Specific Gravity:    | 0.95 +/- 0.02 @ 20 Degrees C |
| Evaporation Rate:    | (BUAC = 1) = 5.5 - 8.0       |
| Appearance:          | Orange Liquid                |
| Odor:                | Ether-Like                   |
| Will Dissolve In:    | Tetrahydrofuran              |
| Material Is:         | Liquid                       |

SECTION 10

SECTION 9

## STABILITY AND REACTIVITY

Stability:Stable.Conditions To Avoid:Avoid heat, sparks, flames and other sources of ignition.HazardousCombustion will produce toxic and irritating vaporsDecompositionincluding carbon monoxide, carbon dioxide and hydrogenProducts:chloride.Incompatibility/Oxidizing agents, alkalis, amines, ammonia, acids, chlorineMaterials To Avoid:compounds, chlorinated inorganics (potassium, calcium and<br/>sodium hypochlorite) and hydrogen peroxides. May attack<br/>plastic, resins and rubber.HazardousWill not occur.

Polymerization:

| Toxicity Data: | Cyclohexanone:         | Oral rat LD50: 1,620 mg/kg                  |
| ioxicity Data. | cycronexanone.         | Inhalation rat LC50: 8,000 ppm/4 hours      |
|                |                        |   |
|                |                        | Skin rabbit LD50: 1 mL/kg                   |
|                | Tetrahydrofuran:       | Oral rat LD50: 1,650 mg/kg                  |
|                |                        | Inhalation rat LC50: 21,000 ppm/3 hours     |
|                | Methyl Ethyl Ketone:   | Oral rat LD50: 2,737 mg/kg                  |
|                |                        | Inhalation rat LC50: 23,500 mg/m3/8 hours   |
|                |                        | Skin rabbit LD50: 6,480 mg/kg               |
|                |                        |   |

|   | MSDS No: CEM075E8<br>Issue Date: 11 Nov 2008<br>Page: 4 of 5   |
|---|--|
| Sensitization:<br>Carcinogenicity:                  | None of the components are known to cause sensitization.<br>None of the components are listed as a carcinogen or suspect<br>carcinogen by NTP, IARC or OSHA. The National Toxicology Program<br>has reported that exposure of mice and rats to Tetrahydrofuran<br>(THF) vapor levels up to 1800 ppm 6 hr/day, 5 days/week for their<br>lifetime caused an increased incidence of kidney tumors in male<br>rats and liver tumors in female mice. The significance of these<br>findings for human health is unclear at this time, and may be<br>related to "species specific" effects. Elevated incidences of<br>tumors in humans have not been reported for THF. ACGIH has<br>classified cyclohexanone (CYH) and tetrahydrofuran as "A3,"<br>confirmed Animal Carcinogens with Unknown Relevance to Humans. |
| Mutagenicity:                                       | Cyclohexanone has been positive in bacterial and mammalian assays. Methyl ethyl ketone and tetrahydrofuran are generally thought not to be mutagenic.  |
| Reproductive<br>Toxicity:                           | Methyl ethyl ketone and cyclohexanone have been shown to cause<br>embryofetal toxicity and birth defects in laboratory animals.<br>Tetrahydrofuran has been found to cause adverse<br>developmental effects only when exposure levels cause other<br>toxic effects to the mother.  |
| Medical<br>Conditions<br>Aggravated By<br>Exposure: | Persons with pre-existing skin, lung, kidney or liver disorders<br>may be at increased risk from exposure to this product.   |

| SECTION 12   | ECOLOGICAL INFORMATION   |
|--------------|--|
|              | This product is not expected to be toxic to aquatic organisms.       |
|              | Cyclohexanone: 96 hour LC50 values for fish is over 100 mg/l.        |
|              | Tetrahydrofuran: 96 hour LC50 fathead minnow: 2160 mg/L.             |
|              | Methyl Ethyl Ketone: 96 hour LC50 for fish is greater than 100 mg/L. |
| VOC          | This product emits VOC's (volatile organic compounds) in its use.    |
| Information: | Make sure that use of this product complies with local VOC emission  |
|              | regulations, where they exist.                                       |
| VOC Level:   | Maximum 490 g/L per SCAQMD Test Method 316A.                         |

# SECTION 13 DISPOSAL CONSIDERATIONS

Waste Disposal: Dispose in accordance with current local, state and federal regulations.

RCRA Hazardous Waste Number: U057, U159, U213 EPA Hazardous Waste ID Number: D001, D035, F003, F005 EPA Hazard Waste Class: Ignitable Waste. Toxic Waste (Methyl Ethyl Ketone content)

| SECTION 15 REGULATORY  | INFORMATION   |  |
|--|---|--|
| Hazard Category for Section 311/312:                                     | Acute Health, Chronic Health, Flammable   |  |
| Section 302 Extremely  | This product does not contain chemicals regulated   |  |
| Hazardous Substances (TPQ):  | under SARA Section 302.   |  |
| Section 313 Toxic Chemicals:   | This product does not contain chemicals subject to SARA Title III Section 313 Reporting requirements. |  |
| CERCLA 103 Reportable  | Spills of this product over the RQ (reportable  |  |
| Quantity:  | quantity) must be reported to the National Response   |  |
|  | Center. The RQ for the product, based on the RQ for   |  |
|  | Tetrahydrofuran (40% maximum) of 1,000 lbs, is 2,500  |  |
|  | lbs. Many states have more stringent release  |  |
|  | reporting requirements. Report spills required under  |  |
| Colifornia Droposition (E.   | federal, state and local regulations.   |  |
| California Proposition 65:   | This product contains trace amounts of chemicals known to the State of California to cause cancer.    |  |
|  | Under normal use conditions, exposure to these  |  |
|  | chemicals at levels above the State of California "No   |  |
|  | Significant Risk Level" (NSRL) are unlikely. Oatey  |  |
|  | Strongly encourages the use of proper personal  |  |
|  | protective equipment (PPE) and ventilation guidelines   |  |
|  | noted in Section 8 to minimize exposure to these  |  |
|  | chemicals.  |  |
| TSCA Inventory:  | All of the components of this product are listed on   |  |
| _  | the TSCA inventory.   |  |
| Canadian WHIMS Classification: Class B, Division 2; Class D, Division 2, |   |  |
|  | Subdivision B; Class D, Division 2, Subdivision A.  |  |
|  | This product has been classified in accordance with   |  |
|  | the hazard criteria of the Controlled Products  |  |
|  | Regulations (CPR) and the MSDS contains all the   |  |
|  | information required by the CPR.  |  |
