

SAFETY AND HAZARDOUS MATERIALS—SIGN-OFF SHEET

The following sheet should be filled out before coming to the laboratory. It is the students responsibility to read the experiment and determine which MSDS's are required for the days experiment. It is also the students responsibility to make sure that the experiment and its directions are understood beforehand. The student should print or type in the relevant information. The list of MSDS's should be arranged alphabetically. This permits a rapid check to ensure that no chemicals have been missed and if some have been missed, to identify which compounds are involved.

I have read and understood the experiment (list exp. # & title below)

Found in _____

Beginning on page _____ and ending on page _____ and have familiarized myself with the material. I have attended and understood the prelaboratory session(s) which treated the experiment, the associated hazards, the safe performance of the experiment and the proper disposal of the various materials employed and generated. I agree to abide by the safety and hazardous materials regulations for this course. I am aware of the locations of all relevant safety equipment in the laboratory and how to use it. I have read and understood the material safety data sheets for all of the materials used in this experiment. These sheets covered the following list of substances:

Compound	Hazards

Signed _____ Student Number _____

Name (Printed) _____

Course Number _____ Section _____ Date _____

Witnessed by _____
(TA's initials)
